

Onyinyechi Clement Onuoha

Data Analyst | Power BI · Excel · SQL

📍 Port Harcourt, Rivers State, Nigeria

✉ Available on LinkedIn

I help businesses and teams make confident decisions through clean data, clear dashboards, and insights that actually mean something.

INTRODUCTION

Hi, I'm Onyinyechi, A Data Analyst with hands-on experience turning raw, messy data into clean insights and visual stories that drive real decisions.

I specialise in helping businesses, teams, and stakeholders understand what their data is actually saying through Power BI dashboards, Excel analysis, and SQL-driven exploration.

Whether you're sitting on a dataset you don't know what to do with, or you need a dashboard your team will actually open and use, my goal is simple: deliver analysis that's clear, honest, and built for the people who need it.

I'm a Tech4Africans Cohort 6 scholarship graduate (Data Analysis track), with internship experience at Decodelabs Tech, and a B.Sc. in Food Science & Technology from Michael Okpara University of Agriculture, Umudike. I bring both technical rigour and plain-language communication to every project.

WHAT I'M GREAT AT

- **Power BI Dashboard Development** – Designing interactive, multi-page dashboards with DAX measures, Power Query transformations, and clean visual layouts, built for clarity, not clutter.
- **Excel Exploratory Data Analysis (EDA)** – Deep-dive analysis using descriptive statistics, IQR outlier detection, pivot tables, and structured insight summaries ready for decision-makers.
- **Data Cleaning & Transformation** – Taking raw, inconsistent, or incomplete datasets and making them reliable, using Power Query M, Excel, and SQL.
- **Data Storytelling & Reporting** – Translating numbers into plain-language narratives and visual stories your team or clients can actually act on.
- **SQL Data Exploration** – Writing queries to filter, join, and aggregate data across relational databases for business-relevant insights.

PORTFOLIO HIGHLIGHTS

Here are some of the projects I've worked on across analytics, dashboarding, and data storytelling:

Project Title	What I Did	Result / Outcome
Power BI Billionaires Dashboard	End-to-end analytics project covering Power Query data cleaning, DAX measures, and a multi-page dashboard visualizing global billionaire wealth trends by industry, country, and gender.	Demonstrated full analytics workflow competency, from raw data to polished insights. Dashboard featured wealth distribution, top earners, and demographic breakdowns across multiple interactive pages.
DecodeLabs Retail Sales EDA (Excel)	Exploratory Data Analysis on a retail sales dataset using Excel. Applied IQR outlier detection, descriptive statistics, and structured insight summaries to surface business-relevant findings.	Delivered clean, documented analysis with actionable insights on sales patterns, outlier transactions, and product performance, ready for stakeholder presentation.
Student Academic Performance	Collaborative group dashboard project analysing student academic performance data. Involved Power Query M code development, slicer configuration, and multi-dimension visual storytelling.	Produced an interactive dashboard tracking grade distribution, subject performance, and attendance trends and successfully submitted as a team deliverable.

More samples available on request.

RECOGNITION & EXPERIENCE

Tech4Africans Cohort 6 — Data Analysis Scholarship Graduate. Completed a structured, industry-focused data analysis training programme covering Power BI, Excel, SQL, and data storytelling best practices.

Internship — Decodelabs Tech. Completed applied data analysis work including EDA on real retail sales datasets, delivering documented insights and outlier analysis.

WHY WORK WITH ME?

There are plenty of data analysts out there. Here's what makes me different:

- **I communicate in plain English** – I don't hide behind jargon. Every chart, insight, and report I produce is designed to be understood by the people who actually need to use it.
- **I care about the full picture** – I don't just clean data and walk away. I think about what the numbers mean for your actual decisions, and I build work that holds up to scrutiny.
- **I'm disciplined about quality** – From IQR outlier checks in Excel to structured DAX logic in Power BI, I work methodically and document my process.
- **I'm available async and I deliver** – I work well remotely, communicate clearly across time zones, and I don't miss deadlines.
- **I'm actively growing** – I have chosen data analysis as my career and I'm building my skills intentionally, new tools, new domains, and new challenges don't scare me.

I'm not just going to do the work, I'm going to deliver results you can measure and insights you can trust.

LET'S WORK TOGETHER

Ready to turn your data into something useful? I'd love to learn about what you're working on.

✉ **Email:** [\[onuohaonyinyechi997@gmail.com\]](mailto:onuohaonyinyechi997@gmail.com)
